

Purple Martin House Package Donated by Spring Creek Prairie

Martin house and pole
Scheel's 8x42 binoculars
Purple Martin book
Value \$300

A Purple Martin can eat 2,00 mosquitoes per day!

Bringing a Purple Martin colony to your yard or acreage is a great way to enjoy bird watching, cut down on insect pests, and help this beautiful bird find habitat as it has lost the ability to nest anywhere but human made houses and gourds. Plus, their cheerful calls accompany you around the yard while working, gardening, or just enjoying the weather.
